

DIVINE REMINDERS

**Our pets come to us as teachers from up above
they embody the power of unconditional love.**

**They chose us individually with specific intention,
manifesting heaven on earth with divine intervention.**

**If given the opportunity their spirit will shine,
to demonstrate the father/mother/God divine.**

**They hold not the issues of worry or care,
those are the burdens that we choose to bear.**

**Our pets absorb our negative thoughts and emotions,
this they do with strong intent and devotion.**

**Though their time with us seems brief when they part,
it is all they needed to share their spirit and heart.**

**Pets are guardian angels that incarnate on earth,
sent to show us simply our true right of birth.**
