

## **HOLISTIC GOALS**

- ✦ Regain balance by treating the mind, body, and spirit!
- ✦ Minimize the need for pharmaceuticals and related risks and side effects (at the very least – decreasing dosages needed for effective treatment)
- ✦ Decrease pain and discomfort naturally.
- ✦ Accelerate healing of tissues – injured or inflamed, trauma or post-surgical.
- ✦ Relieve symptoms from inflammatory diseases naturally itching, scratching, vomiting, diarrhea, etc.
- ✦ Move toward health and vibrance – a beautiful coat, and MUCH more energy and vigor.

## **AN INTRODUCTION TO HOLISTIC APPLICATIONS**

- ✦ Orthopedic problems – e.g., Hip Dysplasia, DJD, CCL tears, luxating patella
  - effective pain management without side effects
  - joint and cartilage cellular rebuilding support
  - expedite recovery and healing
- ✦ Renal Insufficiency (kidney)/ Hepatopathy (liver)/ Cardiac Conditions (heart)
  - support cellular detoxification
  - support tissue healing and organ regeneration/repair
  - increase quality of life and survival time
- ✦ Endocrine/Metabolic diseases – e.g., hyper/hypothyroid, Diabetes, Addison's Disease, Cushing's disease, incontinence, etc.
  - control side effects
  - minimize pharmaceutical dosage
  - support healing and the immune system
- ✦ Inflammatory Diseases – e.g., FAD, Food allergies/intolerances, Atopy, IBD
  - support immune system for appropriate modulatory control
  - support tissue healing on the cellular level
  - support cellular detoxification
- ✦ Injuries/ traumas – e.g., any acute or chronic injury, any pre/post surgical case
  - support tissue healing on the cellular level
  - expedite recovery
  - effective pain management without side effects
- ✦ Immune-mediated diseases
  - support immune system for appropriate modulatory control
  - natural anti-inflammatory options without side effects
  - support tissue healing and organ regeneration/repair
- ✦ Cancer
  - minimize side effects of chemotherapy and radiation
  - other natural anti-neoplastic options and supportive care
- ✦ Critical Care Cases
  - minimize dosages and side effects of other pharmaceuticals
  - supportive vitamin and antioxidant therapies
  - calm and soothe animal in stressful situations
  - expedite recovery
